

# CLEAR VIEW ENCLOSURES

From Tampa to Naples, CRA has you covered. We custom fabricate the highest quality enclosures for you to enjoy your Florida lifestyle.

see what you are missing with Clear View screen enclosures

A picture paints a thousand words! Take advantage of the paradise that is ours here in Florida with an almost unobstructed view through your Screened Enclosure.

Clear View pool screens are designed to be almost invisible! You will absolutely notice that your screened patio, porch or pool enclosure will be visibly brighter and allow you to see more of the Florida scenery that you enjoy.

All new Clear View screened enclosures come with a three-year structural warranty and, like every pool cage or enclosure we install, will meet Florida hurricane standards. Time to repair or replace your existing screens? We can retrofit your existing cage, porch, or patio with Clear View screens. Be careful, though— with screens so bright, you may forget they are there.

You may incorporate your Clear View into one or more of your pool cage enclosure's walls.

Call one of our pool cage experts to explore your options and learn why CRA is the leader in Florida for Pool Cages and Screened Enclosures. Superior construction and expert service from the industry leaders does not have to cost more.

## how Clear View works

The magic behind a Clear View enclosure is rather simple. Supports on a standard pool cage typically span 7' as required by code for necessary strength. All these vertical supports can have the tendency to obstruct an otherwise "million dollar view".

Clear View walls are built with the most structurally advanced extruded aluminum available today. Because the beams are larger and stronger, they are able to span widths of over 20' leaving you with, well, a Clear View (the images at left illustrate).

You may incorporate your Clear View walls on all sides or just on the sides of your pool or patio enclosure where you need them most. Many of our clients elect to use Clear View on just one wall while others use them on several, depending on the lot configuration.

See what a difference a Clear View can make. Call one of our consultants today to discuss your best options. As with our standard pool and patio enclosures, we handle all necessary engineering and permitting requirements as specified by the Florida county in which you live. We then build your new custom enclosure at our production facility prior to installation where we work in a controlled environment to pay maximum attention to every detail. This also greatly expedites the installation process and minimizes the impact to you and your property.

### Relax

From there all you do is enjoy your beautiful new space like thousands already have from Commercial Residential Aluminum.

### You're Covered

Our team of consultants, engineers, builders and service technicians serve homeowners on the Gulf Coast of Florida from Greater Tampa all the way to Naples from our facilities in both Venice and Ft. Myers.
