*Our team of service professionals will quickly and efficiently replace torn or worn out screens ideal for your application and budget.*

## Surprisingly affordable screen replacement for your pool cage, lanai or patio enclosure.

CRA offers a variety of replacement screen depending on your budget and application. As with all screens, be sure to speak with your sales consultant about which screen is best for you. All screens have specific attributes and some may not be appropriate for your individual pool cage. Important considerations include:

1. Durability
2. Visibility
3. Ventilation
4. Shading
5. Mesh size for insect and dirt control

**Economy screen.** This is our standard 18/14 "builder grade" and is the perfect balance of durability and economy.

**Premium screen.** Premium 18/14 screen is our most popular replacement screen for Florida homeowners. This screen offers good ventilation and insect protection.

**SuperScreen.** A heavy-duty alternative, vinyl-coated polyester screening that is ideal for use in high traffic and activity areas.

**PetScreen.** Tear and puncture-resistant screen specifically designed to prevent damage by dogs and cats. Typically installed on doors and lower panels.

**MicroScreen.** A tight 20/20 mesh designed to keep out smaller biting insects.

**SunScreen.** A heavy-duty screening that blocks 80-90% of the sun's heat and bright glare.

beyond replacement screen, give your cage new life:

Many clients take advantage of giving their cage a "Tune Up" when replacing screen panels. CRA can replace your weak or rusted metal screws with non-rusting, high-strength stainless steel screws making your cage stronger than ever before.

We also offer Pool Cage Painting to make your cage look like new or to give it a new color. Ask your associate for some of your options and pricing details.

## how much is replacement screen?

There are several factors that contribute to an accurate estimate regarding the replacement of your pool cage or lanai screen. You can expect to pay between \$1.00 - \$1.50 per square foot and your exact price will depend on the factors outlined below:

1. The amount of overall screen you need replaced.
2. Type of screen you elect to use.
3. Where the panels that need to be replaced are located.
4. Special access issues.

Don't be fooled by "lowballers" who may be using a very cheap inferior screen that will need to be replaced soon or contractors that are not licensed or insured. Trust the experts at CRA to always give you an excellent product and service at a very fair price.
